

## **Line Search Training**

Line Search is a basic core of Londonderry ALERT. Individuals interested in being on the search call out teams are required to attend at least 2 of our exercises in the first year. Training is given in actual wooded field environments which we would operate in.

Line search is the name given to the way in which the search is conducted. Physically a line is formed (shoulder to shoulder in some dense areas) along an axis and moved forward through the specified area searching in a grid. This is done under the leadership of NHF&G or other authority.

Annual training is provided by New Hampshire Fish and Game for classroom and field activity. More frequent outings are planned throughout the year by ALERT.
